

Air Quality Services

ERG's team of engineers and scientists provides a broad range of air quality services to all our market sectors. The collective experience of our staff qualifies us to address any air quality issue related to our client's operation, and has enabled us to develop contacts and good relationships with regulatory permitting personnel in numerous locations.

- Evaluation of Federal, State, and Local Air Emission Regulatory Requirements
- Preparation of Construction and Operating Permit Applications
- Permit Acquisition and Compliance Support
- Major and Minor New Source Review (NSR) Permitting, including Prevention of Significant Deterioration (PSD) and Nonattainment NSR
- Title V Permit Assistance, including Federally Enforceable State Operating Permits (FESOP)
- NESHAP/MACT Compliance Evaluation and Permit Assistance
- Air Pollution Control Technology Evaluations, including RACT, BACT, and LAER Database Analyses
- Assistance with Annual Reporting Requirements, Fee Determinations, and Toxic Release Inventories
- Air Pollution Control Equipment Specification and Bid Package Preparation
- Standard Operating Procedures Preparation to Facilitate Regulatory Compliance
- Startup, Shutdown and Malfunction Plans
- Plant Surveys and Emission Inventory Preparation using Data Management Software
- Air Quality Monitoring and Testing Programs
- Combustion Systems Consulting
- Compliance Programs, Database Design, Recordkeeping and Reporting Systems
