

EHS Support: Industrial-Manufacturing

Streamline Your Regulatory Compliance and Permitting

EarthRes offers comprehensive services that can quickly and efficiently manage and maintain your environmental regulatory compliance and permitting requirements. Our quality support and experienced staff can prepare, review and coordinate your permitting and planning applications with the appropriate regulatory agencies, so you can stay focused on manufacturing.

Our quality of work and reputation with regulatory agencies results in efficient processing of permits and our management systems ensure that you are in continual compliance with all applicable environmental, health and safety regulations including:

- Clean Air Act
- Clean Water Act
- Resource Conservation and Recovery Act (RCRA) – Hazardous Waste Compliance
- Emergency Planning and Community Right-to-Know Act (EPCRA) – Emergency Release Notifications, Tier II Reporting, Toxic Release Inventory (TRI/Form R/Form A) Reporting
- Occupational Safety and Health Act

EarthRes has the capabilities and experience to support your entire range of environmental needs from pre-purchasing due diligence, to planning and regulatory review, pre-construction permitting, to issues facing mature manufacturing operations. This support extends into ongoing compliance management and regulatory reporting including:

- Developing and implementing your Environmental Management Systems
- Preparing and maintaining your Emergency Response Plans
- Managing your record-keeping and reporting obligations
- Training and support

Additional Capabilities & Services

Site Development Planning

- Due Diligence & Environmental Assessments
- Pre-Development Assessments
- Permit and Code Review
- Site Plan Preparation
- Stormwater Management and Design
- Soil Erosion & Sediment Control
- Municipal Approval Coordination
- Construction Contract Documents
- Project Specifications
- Project Management
- Construction Coordination

Environmental & Civil Engineering

- Wastewater Treatment Systems
- Air Pollution Control Systems
- Economic & Feasibility Studies
- Utility Design & Layout
- Surveying, Mapping and Drawing (AutoCAD) Preparation
- Stormwater Management Design
- Erosion & Sedimentation Control Plans

Construction Management

- Specifications, Drawings and Documentation Preparation
- Control Bid Review and Evaluation
- Contract Administration and Scheduling
- Layout & As-Built Surveys, Drawing Preparation
- Construction Quality Assurance
- Procurement Assistance

Investigation & Remediation

- Phase I & II Site Assessments
- Site Characterization & Remedial Investigations
- Remediation Oversight
- Wetlands & Ecological Studies
- Industrial Facility Decommissioning
- NJ Industrial Site Recovery Act (ISRA)
- PA Land Recycling Program – Act 2
- Resource Conservation & Recovery Act (RCRA) Closures
