EARTHRES Expands Services, Markets, and Launches Rebrand

Pipersville, PA — Earthres Group, Inc., a multi-disciplinary engineering firm, is launching a new brand identity and website that elevates the company's brand identity and better reflects its current breadth of markets and services. Marketing now simply as EARTHRES, the company offers a broader range of engineering expertise and related support services to clients in seven market sectors, and currently operates in two regions, Philadelphia and Appalachia, with plans for additional geographic centers. The company has prepared to reinforce its relationships with customers and prospects by introducing the modified name, a new logo and branding campaign, and a memorable new tagline.

With a long history in environmental engineering and earth science consulting, EARTHRES' success and continuous growth have led to diversified services in new markets and expanded services to markets always served. This diversification has strengthened their mission to partner with clients and led them to clarify their value as nothing less than Engineering For SuccessSM - their new tagline. EARTHRES views each project as a means to create, improve, or remedy something important, and while every problem solved is a technical accomplishment, every engineering solution is also a business achievement — a success.

Company Founder and Chief Executive Officer Jan Hutwelker adds, "We've always been driven to contribute wherever we can to our clients' successes. We're simply clarifying that with our new branding. Our new Nexus symbol and logo are reflective of our clean, simple and professional approach to helping clients." Beginning over 20 years ago as a local environmental engineering firm, EARTHRES has grown to a multi-regional team of professional engineers, hydrogeologists, geologists, and scientists. EARTHRES provides an expanded range of civil, mechanical, process engineering, and environmental services in these market sectors:

- Energy
- Mining
- Solid Waste
- Manufacturing
- Food & Beverage
- Commercial
- Government

Beyond its regional bases, EARTHRES also serves national and international clients, providing services in multiple states and countries.

Hutwelker continues, “We want our dedication and commitment to our clients’ success to be top of mind. We offer the highest caliber of engineering, design, and environmental services. Our clients count on that as we partner with them to meet their project goals as well as their long-range goals. We engineer for their success.”

With expanded engineering and support services and growing regional footprints, EARTHRES is well-positioned for continued growth. In addition to increasing value to its clients, EARTHRES will also be creating more jobs and contributing to the local economies of its regional offices and the markets in which its clients operate.

EARTHRES helps its clients succeed by designing their facilities, streamlining their processes, ensuring regulatory compliance, and reducing operating costs, including:

- Civil, Mechanical, Mining, and Process Engineering
- Solid Waste & Water / Wastewater Engineering
- Land Development and Stormwater Management Design
- Geology, Hydrogeology, and Spring Water Services
- Oil and Gas Facility Design and Construction Support
- Landfill Gas/Biogas and Gas to Energy Services
- Environmental Investigation and Remediation
- Permitting and Compliance

Visit their updated website for a full listing of services at www.earthres.com or call them at 800-264-4553.
